SUMMARY

Informatics graduate (GPA 3.12/4.00) with hands-on experience building fullstack web applications using React.js, Next.js, and Node.js. Has built REST APIs, implemented authentication middleware, and designed database schemas with MySQL, Supabase, and Firebase across company, government, and academic projects. Seeking a Junior Fullstack Developer or Junior Backend Developer role.

EXPERIENCE

Backend Developer | ATMOS Education (Project for BMKG) Mar 2026 — Jul 2026

- Developed structured REST API endpoints and backend features, including authentication middleware and account management, for a centralized exam and information system (SKD & SKB).
- Resolved complex development tickets and bugs, including 502 error handling and soft-delete logic in the database.
- Technologies: Node.js, React.js, Next.js, REST API, GitHub

Fullstack Developer | Universitas Jenderal Achmad Yani Jul 2026 — Aug 2026

- Designed and built an interactive dashboard website to digitize and visualize BULOG rice stock data.

Backend Developer Intern | PT Cipta Niaga Gas Indonesia Aug 2025 — Sep 2025

- Designed and built the backend logic and database architecture for the company's web-based monitoring system.
- Developed structured REST APIs to connect data reliably to the web platform.

EDUCATION

Bachelor of Science in Informatics | Universitas Jenderal Achmad Yani Sep 2022 — 2026
Bachelor of Science in Informatics | Universitas Jenderal Achmad Yani 3.12 GPA

High School Diploma, Science | SMA Negeri 2 Padalarang Jul 2019 — May 2022
High School Diploma, Science | SMA Negeri 2 Padalarang High School Diploma, Science

PROJECTS

Ndaru Farm (Thesis Project) | | https://ndaru-farm-frontend. Nov 2025 — Feb 2026
vercel.app

- Built a fullstack farm management web platform, including user profile pages and a product catalog with a responsive interface.
- Connected frontend to backend data flows so product information and account settings can be managed end to end.
- Technologies: React.js, Next.js, Tailwind CSS

DIGIBOOKS (Academic Project) May 2023 — Jun 2023

- Developed a responsive website for reading and managing a digital comic catalog.

SKILLS

Programming Languages
JavaScript HTML5 CSS3

Frontend
React.js Next.js Tailwind CSS

Backend
Node.js REST API Swagger (API documentation) Authentication Middleware

Databases
MySQL Supabase Firebase

Tools
Git GitHub GitLab

CERTIFICATIONS

Certificate of Completion: Backend Developer, ATMOS Education, Jul 2026 (Ref:

007/SF/ATMOS/VII/2026)

Participant, "Unlocking Educational Potential with AI" Webinar, Day of AI Indonesia x Universitas

Jenderal Achmad Yani, Jun 2026
